

Pricing Updates January 4, 2021

2020 has been a challenging year for us all and we thank you for your business loyalty and support.

Just some of the many challenges that have arisen this past year are the rising cost of commodities such as copper and aluminum; DLC new standards; and a rise in international shipping costs.

CSC LED is committed to providing you the best quality LED solutions and never skimp on quality or performance.

During this past year, we have invested in and expanded our lighting portfolio. We have added even more cutting edge products with many added features. We have also continued to develop our online portal and internal systems to build and support the e-commerce solutions that we all need during this difficult time.

We have reviewed our pricing structure and have made adjustments where required; some products have gone up slightly while others have seen a decrease in price. We have also reduced the cost of many products in our clearance section providing a great opportunity for you to stock up and take advantage of the added savings.

We are working hard to continue to provide our valued electrical wholesale customers the best products at the best price, with the best customer service.

Should you have any questions or concerns, please feel free to reach out to us at info@csc-led.com or contact your local sales representative or sales agency.
