To our valued partners;

Unfortunately, we have all felt the tremendous pressure due to global supply chain issues.

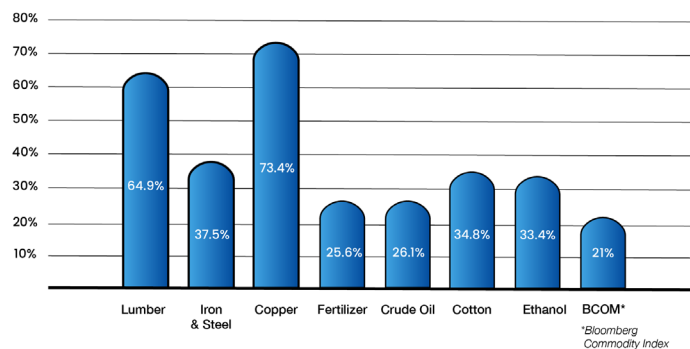

At CSC LED, we have worked hard to avoid having to pass on price increases to our valued customers during a

difficult time; however, with price increases for raw materials and almost a 600% increase in shipping costs, we are forced to announce price increases on all CSC LED products. Our clearance and legacy products are not being price adjusted, making it a great opportunity to stock up on these limited supply items at great prices.

New prices will be reflected on our website on November 29<sup>th</sup>, 2021. Should you require any further information, please reach out to your local sales rep.

### Price Increases for Selected Commodities from March 2020 to March 2021

On a positive note, we saw the writing on the wall some time ago. CSC LED made significant investments in our inventory offering and ramped up production earlier in the year. Our inventory levels have never been higher and new shipments (albeit

at a higher cost) are flooding in and will continue to do so for the foreseeable future. While we can't promise we will never have a product shortage, you will be pleased to find that CSC LED has some of the best stock levels and delivery ETAs in the industry.
