CSCLED

SSL REMOTE CONTROL (SSL-REMOTE)
Operating Instructions

Turns Fixture Off
To turn on the light, please use M1 or M2 or M3

OFF

100% brightness for first 5 hours.
M1
After 5 hours, dim to 30% and 100% when motion detected.

Increase Power
Increases light intensity for a few seconds only.
Strictly for testing purposes.

Maintains 70% brightness
M2

Decrease Power
Decreases light intensity for a few seconds only.
Strictly for testing purposes.

Intensity remains at 30% and switches to 100% on motion detection.
M3
Intensity will revert to 30% after 30 seconds of no motion.

OFF

M1

M2

M3

M1:100% 5hours
      30%---100%+PIR 5hours
      70%until the morning
M2:70%normally on
M3:30%---100%+PIR
↑ : Increase power
↓ : decrease power

PLEASE NOTE:
M3 is the most energy conservative mode and is recommended for most applications.
