

Commercial INSTALLATION

CSC LED's Decorative Wall Sconces (DWS) were recently installed on a newly built commercial building located in Calgary, Alberta.

When choosing suitable outdoor commercial lighting, it is important to consider factors such as wattage, durability, operating temperature, fixture size, security needs, cost and more. This outdoor project required lighting that was not only bright and powerful, but also reliable in Alberta's cold climate.

The DWS series offers three styles of decorative covers in bronze and black finishes to fit the stylistic needs of any project without

sacrificing functionality. These fixtures offer bright illuminance in a low-profile with a light-weight base making them suitable for even the tightest of spaces.

The customer needed durable, stylish and affordable lighting for this project and that's why they made the smart choice of choosing CSC LED. With our 5-year warranty, our customers can rest easy knowing that our team of dedicated professionals are there to help with any technical, installation or safety questions related to their lighting purchase.

DWS SERIES

Initial Lumens	1,300 lm
Efficacy	87 lm/W
CRI	80
